

Product Description (MDT)

(i) Display & Touch Screen

The device display is a transfective TFT LCD along with 4-wire resistive touch screen.

(ii) Wireless Modules

WCDMA (3G) is available in MDT.

(iii) Light Sensor

MDT is equipped with a light sensor that detects the light/dark surrounding environment. The LCD backlight adjusts automatically according to the status of the light sensor.

(iv) Keypads

There are 10 lighted hardware keys. Please refer to diagram.

(v) Battery, SD and SIM Card Slots

The battery, SD and SIM card slots are all located in the back of the device. The slots are covered by hard plastic covers and are locked by screws from water and dust.

(vi) Cables

Please contact **Prognostic Services** if custom cable configuration is needed.
